Mr. Jacobs helps people, organizations, and their leaders grow and be more successful. He has been involved in GA for more than 40 years as a pilot and supporting the FAA, TRB, ACRP, and other aviation stakeholders. He is an engineer whose experience includes safety; cybersecurity; technology; leadership; and workforce development. He has a passion for learning; innovative problem solving; helping leaders and organizations navigate change, and; aviation.

Mr. Jacobs has been hanging out at small GA airports since he was 4 years old, going to the very small local airport on weekends with his dad who ran a flying club .. that airport is now a shopping center.

Eric and his partner, Michael Cummings, founded Airport Monitoring Systems to affordably empower airport managers, airports, consultants, and states with information that will help them and GA be more successful.
