

Kirsten Kennedy, PE (formally Kirsten Brown) is a civil engineer with 9 years of experience. She has been actively involved in AAAE NEC throughout her career and served as the Yo Pro co-chair from 2022-2023. She has served on the AAAE NEC Airport conference planning committee since 2021. Kirsten graduated from Drexel University in 2015 with a degree in Architectural Engineering and Civil Engineering. She started her career in Construction working for Walsh Construction on the PennDOT P3 Rapid Bridge Replacement project building bridges through PennDOT District 5. She then moved to Philadelphia where she became an Aviation Engineer for Urban Engineers. Throughout her time at Urban Engineers she worked in design, construction and project management. Kirsten is now an assistant project manager in aviation for Michael Baker International. Throughout her 8 years in aviation, Kirsten has worked for a variety of aviation clients from small general aviation airports to large commercial and military airports. She is passionate about designing projects with constructability and airport operations in mind while prioritizing quality and best value. She is a professional engineer licensed in Delaware, New Jersey and Maryland.
