Safety Management System Implementation

NEC AAAE Airports Conference

Lisa M. Gardner, A.A.E. is a transportation professional and proven leader in safety, security, operations, and technology. Skilled at strategic delivery of enterprise programs, she is most recently responsible for Amtrak's implementation of safety management system technology across the United States, in use by over 20,000 employees. During her career with the Port Authority of New York & New Jersey, she unified business practices across the airports to achieve consistent and measurable outcomes. At PANYNJ, she served in senior management at the airports and aviation headquarters with career highlights including implementation of reforms to aircraft firefighting and to airfield maintenance and serving in the role of Airport Security Coordinator to the Transportation Security Administration during a time of significant change. She attained the Accredited Airport Executive (A.A.E.) from the American Association of Airport Executives (AAAE) and holds several other industry credentials and certifications. Lisa's current passion is delivering technology that works for executives and front-line workers alike.
