

## **Matthew Scott**

Senior Project Manager

Matthew is a Senior Project Manager for Rifenburg Construction Inc., based out of Troy, New York. Rifenburg Construction is a Heavy Highway Construction company that works on projects all across the state. His career at Rifenburg began in 2008 while working as an intern at the site development project of Luther forrest Technology Park. His strong attention to detail, problem solving skills and desire to gain more field experience earned him the opportunity as Project Superintendent in 2013. Matt spent the next three years growing and understanding all of the intricate details that go into completing a project on time and on budget. In 2016, Matt took the next step and became the Paving Department Manager as well as a Project Manger. Matt's responsibilities ranged from running \$20 million in projects, and managing the schedule and resources of three paving crews and two milling crews. Over the course of his career, Matt has been involved with the installation of water main, storm sewer, sanitary sewer, retaining walls, bridges, box culverts, and road rehabs to name a few. Most recently, Matt has taken charge of growing Rifenburg's interest in constructing Airports all around New York State. Matt has also worked to improve and perfect specialty paving requirements for the company that allows Rifenburg to stand out from other companies in the same field. Prior to working at Rifenburg Construction, Matt received his Bachelor's Degree from the SUNY Polytechnic Institute in Civil Engineering Technology.
