

Abbas is a Senior Pavement Engineer with over 10 years of experience in pavement research, consulting, and engineering. He has been involved in several pavement testing, analysis, and management projects. Abbas has conducted pavement evaluations involving manual and automated pavement condition surveys, pavement structural analysis, and implemented enterprise Pavement Management Systems (PMS) for airports, cities, and counties. His understanding of the PMS tool and his passion for pavement management have made him a great asset in training. He has also been involved in GIS integration and mapping of assets for pavement management systems. Abbas is also a member of the pavement technical committees at TRB and ASCE.
