

Luigi, who holds a master's degree in architecture from the Polytechnic University of Milan, has over 25 years of robust experience in managing the design of large-scale projects across Europe and Asia.

In 2023, he relocated to Boston and joined Jones Payne, where he focused his expertise in the Aviation sector and community planning. He leads the firm's Advanced Air Mobility (AAM) infrastructure initiative, which is designed to enhance Urban Air Mobility (UAM) services in communities that lack adequate public transportation options. His work involves collaboration with regional and metropolitan airports to develop comprehensive planning strategies that integrate social and environmental mitigation measures, all grounded in smart city design principles.
