

Mr. Dzwilewski (Ji-le-ski) is a Pavement Engineer for the Department of Defense and Commercial Airport Program at Applied Pavement Technology, Inc. (APTech) with 15 years of pavement engineering experience. His technical efforts focus on airport pavement management and evaluation that provide a cost-effective approach for preserving and improving pavement infrastructure. Peter-Paul has served as the lead engineer or project manager on pavement management and evaluation projects for 45 United States military installations, 25 Canadian Department of National Defence facilities, and numerous commercial airports including large hub, small hub, reliever, and general aviation facilities for APTech.
