

Todd Stevens, SET, CFPS

As operations manager at SEVO Industrial Fire Protection (IFP), Todd and his team provide smart, safe, and sustainable fire protection solutions to customers worldwide. IFP is a turnkey fire protection contractor providing design, installation, project management, and maintenance of special hazard systems, including chemical agents, inert gases, foam, water mist, and various fire detection applications. From aviation, data centers, and waste facilities, to energy storage systems and power generation, IFP systems are trusted to protect some of the world's most valuable critical infrastructure assets. As operations manager, Todd oversees daily operations, business development, project implementation, logistics, and is a critical member in the company's overall growth and success.

Todd holds an associate degree in mechanical engineering and is certified in the following: National Institute for Certification in Engineering Technologies, NICET IV in Water Based Systems Layout, NICET III in Special Hazard Suppression Systems, and is a Certified Fire Protection Specialist. He is also a principal technical committee member of NFPA 409, Standard on Aircraft Hangars. He is active in numerous fire protection associations such as NFPA, SFPE, and is a Past President of the FSSA.
